

CAPABILITY STATEMENT

PEOPLEMOVER SOLUTIONS

The Bus 4x4 Group of companies specialises in delivering innovative solutions to transport groups of people in off-road conditions comfortably, reliably and safely. Australian-owned and globally renowned, our people mover solutions lead the sector for 4WD conversion products, accessories and parts.

Bus 4x4 Group continues to evolve and constantly improve our products and services to stay ahead of the ever-changing market. No matter how tough the terrain or how remote the location, our 4WD peoplemover solutions go further to drive your efficiency and profitability.

We're always moving forward and we're passionate about going the extra mile to deliver for our customers. Across our entire range and our full capabilities, our solutions give your business more go – more performance to move more people to more places.

MORE GO

Our mission

Bus 4x4 Group aims to be the preferred supplier of comfortable, safe and reliable 4WD buses on the market both in Australia and globally.

Our values

- » Integrity
- » Accountability
- » Responsibility
- » Innovation

Our quality commitment

Bus 4x4 Group is ISO 9001:2015 Quality Management Systems Certified covering bus manufacture and installation and export of 4WD automotive systems.

We take quality seriously which is why all our products are manufactured under stringent Australian standards for installation in Australia or to export worldwide.

All Bus 4x4 products are certified in conjunction with Australian Government Motor Vehicle Standards under ADR (Australian Design Rule) and complied as SSM (Secondary Stage Manufacture).

Always exceeding expectations

Since 2011, the Bus 4x4 Group of companies has been researching, developing, perfecting and manufacturing innovative peoplemover solutions. Our vast specialist knowledge and years of experience have seen us become recognised as the leading provider of AWD conversion kits.

We deliver comfortable, cost-effective, safe and reliable peoplemover solutions for challenging, rough or remote terrain. With a Bus 4x4 vehicle, you save time and money and have the confidence that you can go anywhere.

THE BUS 4X4 ADVANTAGE

- » Highly experienced R&D team
- » Fully compliant and field proven products
- » State-of-the-art facility
- » Australia wide and global distributor network

You always get more go from a Bus 4x4 vehicle.

GROUP CAPABILITY

Conversion Solutions

Bus 4x4 Global manufactures our innovative AWD conversion kits, providing 4WD conversion solutions for our authorised dealers in Australia and across the globe.

MANUFACTURE + EXPORT

Peoplemover Rentals

Bus 4x4 Hire rents and services a wide range of 4WD peoplemovers for business, providing an easy, reliable and cost-effective way to transport people through challenging terrain.

HIRE + SERVICE

Conversion Technicians

Bus 4x4 Kitshop is where our expert technicians convert 2WD buses and vans to 4WD vehicles, customised with specialised equipment and after-market accessories.

BUILD + SELL

GoKit

Our 4WD Conversion Kit, Bus 4x4 GOKIT, converts 2WD buses and vans to 4WD, giving our customers more go. It's fitted into all our vehicles and sold through our distributor network.

OUR PRODUCTS

Bus 4x4 builds 4x4 conversions and 4WD buses for mining, tourism and remote terrain, providing effective off-road and on-road transport solutions for challenging terrain. Bus 4x4 converted 4WD buses can help you save time and money, thereby delivering better efficiency and higher profitability.

4x4 Conversion of Toyota HiAce

4x4 Conversion of Toyota Coaster

Independent front suspension for increased manoeuvrability, higher ground clearance.

4x4 Conversion Kits

High and low-range 4x4 all wheel drive with modified independent front suspension for increased comfort and higher ground clearance.

Custom Engineered Solutions

Our highly skilled team of researchers, developers and technicians can design customised solutions to increase vehicle safety, visibility, performance, and function.

PROVEN INDUSTRY PERFORMERS

The Bus 4x4 Group of companies has proven experience servicing the Mining, Tourism and Government industries, including education and health. Our clients include major state, national and global organisations and operators, and we export conversion kits to United Arab Emirates, Japan, Europe, PNG, Southern Africa and South America.

MINING

TOURISM

GOVERNMENT

TEAM EXPERTISE

Our senior management team has over 30 year's experience providing fleet solutions for the mining and tourism sectors.

With an unstoppable passion for developing new products and evolving our existing ones, the team uses their expertise to provide leading-edge solutions for a wide range of applications.

PHILL HARGREAVES Executive Chair

Phill is a highly experienced and dynamic leader who has grown Bus 4x4 Group of companies from just three employees to nearly 40. Working closely with customers, Phill is a problem-solver by nature, constantly looking forward to how Bus 4x4 can continue to set new standards that the others follow. He strongly believes that the sale or hire of a vehicle is just the tip of iceberg for what we deliver to businesses and organisations.

TONY WRIGHT Managing Director

Tony is a transport industry veteran and is responsible for overseeing all production, finance and operational staff. An important part of his role is overseeing the continual testing of vehicles in our hire fleet that need to operate efficiently, safely and reliably in the very harshest off-road conditions. Together with his team, our stringent testing regime ensures that any issues are identified and corrected before vehicles are deployed or mobilised to site.

STEVE HARGREAVES National Fleet Manager

Steve heads up Research & Development and Bus 4x4 Hire. He works directly with customers across all industries, gaining a deep understanding of their specific vehicle needs and then devising the ideal solution to meet them. With an unstoppable passion for developing new products and evolving existing ones, he uses his expertise to provide leading-edge solutions for a wide range of applications.

Always hands-on and constantly creating, he has an unwavering focus to challenge what's been done before to keep one step ahead of the ever-changing off-road industry. His commitment to ensuring our products give our customers more go has built our reputation as the best supplier of reliable, comfortable and safe 4WD peplemover solutions in Australia and overseas.

VALUED PARTNERSHIPS

Our Clients

WHAT OUR CLIENTS SAY

”

We took a full van load of walkers... against the advice of my guides down the notorious Duck Creek Road which was never been in such a bad way with huge holes, exposed rocks, deep ruts etc. All I can say is that the Bus 4x4 Commuter was fantastic. Even with a full load, the van did not bottom out even once and in a few tight parts had only 3 wheels on the dirt. Yet it tracked well and essentially was a well behaved 4WD. As tour operators, we totally recommend this bus.

Shane O'Reilly, Managing Director
O'Reilly's Rainforest Retreat

”

I was a major skeptic of the abilities of the Bus 4x4 conversions... when I drove a newly hired Coaster for our Adventure Tour, I did it with apprehension. I took the bus down to Inskip Point for my first soft sand challenge, stopping just before the really soft sand to lock it into low range. To my surprise, without changing gears, I was able to get the Coaster out of the soft sand onto the hard wet sand before the barge without any issues.

There was nothing that seemed to worry this bus, it drove through everything the island threw at us in normally dry boggy testing conditions in sand. I would not hesitate to buy one!

Darryl Roper, Guide
Fraser Island Adventure Tours

”

We took a 70 Series Bus 4x4 converted Toyota Coaster for a brief on-road drive and were most impressed with its 'factory feel'. Steering, ride and handling felt no different from standard Toyota Coaster behaviour, despite the higher stance of the modified vehicle.

The Bus 4x4 conversion is fitted with full-time 4WD and the dial control for 4WD with centre diff locked and for low range engagement is straight from the LandCruiser 200 Series.
